

# Adobe Creative Cloud for enterprise

## **Empower your students with the digital literacy skills they need to succeed.**

Digital literacy is quickly becoming a required competency for employment in today's economy. By using Creative Cloud apps and services to integrate creative projects into courses throughout your curriculum, you can help your students develop skills like visual thinking and persuasive communication that will give them an edge in the classroom and in their careers.

## **Boost classroom engagement and academic performance.**

Incorporate digital communications to help your students master their subject matter, stay immersed in their material, and improve their learning outcomes. Give them the tools to communicate their ideas, discoveries, and arguments in compelling digital experiences—like images, infographics, websites, videos, animations, mobile app designs, and 3D and AR content—so their messages have impact.

## **Build essential skills.**

Give your students hands-on access to content-creation tools so they can develop essential skills like communication, critical-thinking, creative problem-solving, and collaboration.

## **Create employment advantages.**

Students who use Creative Cloud apps learn skills hiring managers crave, such as the ability to present information and solve problems visually. They can build their personal brands and create rich ePortfolios that make their work stand out to recruiters. They can walk into interviews and start their jobs already having mastered industry-leading digital tools that companies use every day. And they'll have the aptitude to learn new tools and skills as technology evolves.

# Adobe Creative Cloud for enterprise

**Take advantage of flexible licensing options that deliver the following tools and benefits to your students, faculty, and staff:**

## Industry-leading desktop and mobile apps

Creative Cloud for enterprise provides ongoing access to professional creative tools used throughout the modern workplace. They include favorites like Adobe Photoshop, Illustrator, Premiere Pro, XD, and Acrobat as well as all-new Adobe Photoshop on the iPad, Adobe Fresco for drawing and painting, and Adobe Aero for designing interactive experiences in augmented reality. Extend the power of your desktop apps with integrated mobile apps and cloud services. And learn fast with hundreds of tutorials for every experience level.

## Connected assets and secure sharing

Creative Cloud Libraries streamline collaboration by letting you access and share files, fonts, colors, images, videos, prototypes, and other assets right inside your Creative Cloud apps. The Adobe Fonts service delivers thousands of free web fonts, and Creative Cloud Assets offers prebuilt templates to help jumpstart class projects and assignments, faculty presentations and teaching materials, and more. Plus, you can browse, preview, and license millions of high-quality, royalty-free Adobe Stock images, graphics, videos, and more right within your Creative Cloud apps.<sup>1</sup>

## Shared Device Licensing and easy administration

Shared Device Licensing enables students, faculty, and staff to access the full power of Creative Cloud desktop apps and online services in shared environments like labs, libraries, and classrooms. IT admins can easily configure and support multiple profiles by Active Directory OU, LAN IP(s), or installed package. The web-based Adobe Admin Console makes license management simple.

## 24x7 support and powerful data protection

Stay productive with onboarding assistance, 24x7 technical support for end-user troubleshooting, and consulting sessions with Adobe product experts. And help protect your data with in-transit and at-rest encryption.

## Simplified student asset migration

Now it's easy for your students to take their Creative Cloud assets with them after graduation so they can showcase their work to future employers. Adobe offers an online tool that lets them migrate their assets from school-assigned accounts to new free Creative Cloud membership accounts that include trial versions of most of Adobe's creative apps, and graduates can easily upgrade to get full versions of all the apps and services that were included in their school accounts.

For more information, contact your school's IT Department or visit <https://helpx.adobe.com/enterprise/using/enable-student-asset-migration.html>.

Encourage your students to visit <https://graduation.adobe.com> to get started.
