Good afternoon,

Rutgers University recently entered into a new agreement for Lucid Suite software, which includes the Lucidchart and Lucidspark programs. Now, faculty and staff can purchase a subscription for both Lucidchart and Lucidspark for the price of just Lucidchart.

Lucidchart is a cloud-based diagramming tool that allows users to collaborate on drawings, charts and diagrams, in order to visualize processes, systems, and organizational structures.
- Cloud-based platform allows you to start diagramming instantly
- Real-time co-authoring, in-editor chat, shape-specific comments, and collaborative cursors
- Overlay important metrics on existing diagrams through data linking
- Use auto-visualization to generate organizational charts, entity relationship diagrams, and more

Lucidspark is a virtual whiteboard that connects teams so they can bring their best ideas to life.
- A space to brainstorm on a shared digital canvas
- Build off each other's thoughts and share feedback to create the best ideas
- Turn ideas into a collection of clear, actionable next steps
- Take the ideas you created in Lucidspark and build them into workflows in Lucidchart

To learn more, please visit the Lucid website or go to the University Software Portal to purchase Lucid Suite. If you have any questions, please email software@rutgers.edu.

Thank you,
Susan Schwerdt (she/her)
