

November 2025

Showcasing the power of Rutgers IT

The [2024–2025 Rutgers IT annual review](#) is now live, highlighting this year's progress in technology services, tools, and support—and the ways IT plays a key role in driving excellence in teaching, research, service, and healthcare. Explore the full report, watch the highlight video, and browse examples of standout IT initiatives from across the university.

New storage option for research data

The Research Data Storage (RDS) platform is now available to support Rutgers researchers who need dependable, high-capacity storage for large, non-sensitive datasets. RDS offers a simple, consistent way to store, access, and share research data internally. [Learn more or request access on the RDS webpage.](#)

Stay safe: Stick with approved AI tools

Rutgers offers a set of approved generative AI tools with built-in security protections for university work. Using these versions ensures your data isn't used to train AI models and helps protect your information. If you're using AI for teaching, research, or day-to-day tasks, stick with the Rutgers-approved options. [View the list of approved AI tools.](#)
